 Sunny Cities Pico Hibiscus  
 SunPatens

### Table to Garden Roses™

The varieties were chosen by our grower for outstanding form not only for potted plant production but garden performance as well. Not to be confused with "throw away" varieties with little to no disease resistance and winter hardiness, these varieties are garden roses in miniature.

Fireworks™

Montana™

### My Bouquet™

The My Bouquet™ collection represents years of breeding and selection for larger flowers on more compact plants. Average height is 24-36 inches. The selections exhibit characteristics from several classifications: Hybrid Teas (long stems for cutting), Miniatures (faster repeat bloom), Floribunda (bloom in clusters) and cut flower types (7-10 day vase life). Technically classified as Mini-floras, all have fully double flowers and several are fragrant. Winter hardy to USDA Zone 4.

Double Take™

Ambiance™

### Garden Treasures™

This is a collection of Roses was developed for use in bedding plant type applications. These can be sold as annuals in 2 1/4-inch pots up to 1-quart containers. These Roses have the versatility of being sold as a perennial, for applications in large containers or mixed plantings. Zones: 4b to 11. Characteristics of this collection include: Compact growing habit with good disease-resistance, maximum height of 12-inch by 12-inch wide, heavy branching plants with the branches coming from the crown of the plant, small foliage, heavy bloomers and self cleaning.

Star Ruby™

Citrine™
