The revolutionary Basewell program takes advantage of offshore rooting of cuttings to save growers time, money, labor, and space. Our rooted cuttings come in individual biodegradable cartridges and can be directly stuck into quarts or gallons. Growers can expect a fully flowering and saleable product in just 12-weeks — no additional transplanting steps needed!

Stick to sale in  
12-weeks or less!

# HOW TO PLANT BASEWELL™

## STEP 1

- ▶ Grab the stem above the cartridge to avoid damaging the roots. This ensures your fingers won't displace soil next to the roots during planting. This is critical to maximize root-to-soil contact.

## STEP 2

- ▶ Push the cutting into the media, with the top of the cartridge at soil level. Never use a pre-dibbled hole. This will cause air gaps between the roots and the media. Directly plant into the soil.

## STEP 3

- ▶ Drench plants thoroughly to ensure good root to soil contact. Plants should be protected with shade or misted for the first 3-5 days.

## THINGS TO AVOID

- ✗ **Do not create a dibble hole**, as it will leave too much air around the roots. Simply stick the cartridge into the soil like a dart.
- ✗ **Do not hold onto the cartridge**. Instead, grab the stem above the cartridge so that it makes direct contact with the soil and you avoid creating space around the cartridge.
- ✗ **Do not simply mist like a traditional unrooted cutting**. Soak in the plants so that the soil can penetrate the cartridge and adhere to the roots.

# PHLOX BY SEASON

## Early Spring

### Spring Series:

This is our earliest flowering groundcover phlox with a bloom window of 7-days between all colors to deliver a full palette of color to retail all at once.

Dümmen Orange is the only one-stop-shop for a full season of sales with the most diverse portfolio of phlox varieties worldwide.

## Spring

### Woodlander Series:

An interspecific groundcover phlox with more robust habits, larger flowers, stronger garden adaptability, and a long-extended flowering season for groundcover phlox.

## Late Spring

### Early Series

This interspecific upright garden phlox kick-starts the summer selling season with the earliest flowering upright phlox and superior disease resistance.

## Early Summer

### Flame Pro Series:

This is a subset of the Flame lineup with varieties that are all perfectly uniform in timing and size, providing growers with a predictable and programmable lineup.

## Summer

### Flame Series:

The original compact paniculata phlox with superior mildew resistance. Big, bold inflorescences make a very showy display throughout summer gardens.

Learn more about these programs here.
