YOUR TRUSTED SOURCE
FOR MICROS & LINERS

TM

SUNSHINE
HORTICULTURE

OUR FACILITY, PRODUCTS & SERVICES

We produce a wide assortment of quality liners from tissue culture, seeds and cuttings to meet the needs of the interior foliage and landscape industries. Furthermore, we are working towards supplying medicinal plants, forestry and plantation crops to other industries that are looking for more sustainable ways of doing business.

In addition to liner production, our micro division has the capability of working with customers to develop micro production programs of standard industry plants as well as programs tailored for their patented and proprietary plants.

THE VALUES

We believe strongly in team work and customer satisfaction. We value the dedication of our talented staff and we are motivated to be a progressive company that upholds the expectations of our customers while being socially and environmentally responsible.

THE BUSINESS

Through strategic alliances with well established, globally located, state of the art tissue culture labs, the company has maintained a reputation for delivering quality liners and micros on a consistent basis with competitive pricing.

THE PURPOSE

Sunshine Horticulture, LLC was founded in 2004 to provide quality liners and micros to the horticulture industry, both domestic and overseas.

AGLAONEMAS

This plant is also known as Chinese Evergreen. These varieties have brilliant and vibrant foliage which will make wonderful additions to any household's interior or patio.
