Featured Plants-Edibles

This month we are taking a look at another section of the Edibles market, Veggies!! These are grafted veggies and have a great marketing program behind them, that includes the ability to purchase branded pots and tags. Check out these voluptuous veggies!

Jalepeno Pepper

Golden Bell Pepper

Brandywine Tomato

Rosa Bianca Eggplant

Grafting is a natural process that joins the top part of one plant (scion) to the root system of another plant (rootstock) without any genetic modification. As tissues heal, the two plants fuse, combining the rootstock's vigor and disease resistance – for increased water and nutrient uptake for higher yields – with the scion's exceptional fruit quality and flavor.
