New Tissue Culture Plants available

Abelomoschus manihot, or the South Sea Salad Tree™, is an edible species in the Hibiscus and Okra family Malvaceae that is native to tropical Asia and northern Queensland. While the plant is 100% Edible, the leaves are mostly consumed either as a fresh addition to salads or wilted and cooked similar to spinach. Growers can finish a 4" in 4-6 weeks, in full sun to part shade. 'Kiko's Crump' is featured to the left. 'Chief Kubo's Prize' and 'Auntie Lilli's' are also included in this series. Available in a 72cp.

Alocasia plumbae 'Flying Squid'

A unique form of *Alocasia plumbae*, 'Flying Squid' has ultra dwarf habit. It takes 8-12 weeks for a 4-6" pot. Height of 1 foot, and suitable for zones 9-11. Available in 72cp.

Philodendron 'Baby Hope'

This variety is an ultra compact, dwarf form of *Philodendron 'Hope'*. 'Baby Hope' was developed by Dr. Jake Henry. For growing in shade to partial sun, this variety is suitable for zones 9-10. Available in 72cp.

We'll see you at TPIE 2018!

We'll be showcasing at the upcoming TPIE Show in January. We hope to see you there!

Featured Plants

Begonia Megawatt™

The Megawatt series has striking, non-stop flowers that keep plants covered in Megacolor from Spring through Fall. Sturdy flower stems hold flowers above the foliage for superior show versus others. This series shows well as retail and perfect for landscapes, baskets, big tubs and borders.

Available as 144cp and 288cp
